

HEALING BAT

ADVANCED SENSING, MONITORING
AND SELF-HEALING MECHANISMS
TO SELF-REPAIR BATTERIES

New sensor-actuator concepts to allow for implementing self-healing materials and healing strategies in key battery components of the lithium sulfur (Li-S) battery

A toolbox with self-healing materials, relevant sensors and bespoke Battery Management System, to maximise the battery performance and prevent its degradation

HEALING BAT will contribute to transforming Europe's battery cell industry towards a more sustainable and competitive role

PROJECT PARTNERS

This project is part of BATTERY 2030+, a large-scale European initiative to invent the sustainable batteries of the future, which has received funding from the European Union's Horizon Europe research and innovation programme under grant number No. 101104022.
